LinkedIn: linkedin.com/in/mark-anthony-suerto-6a06881bb

Full Stack Engineer with 5+ years of experience building enterprise-grade web applications on ASP.NET Core, C#, and SQL Server. Specialized in nopCommerce e-commerce platforms, RESTful API development, and clean-architecture backends. Beyond code, I work as a video editor and build AI-driven automation pipelines that schedule and publish content to TikTok and Facebook. Comfortable owning features end-to-end — from database design and API contracts to frontend delivery and post-launch optimization.

WORK EXPERIENCE

Software Engineer

2020 – Present

2DO IT, ERP & WEB SOLUTIONS

- Own end-to-end feature delivery on nopCommerce e-commerce platforms — covering server-side logic in C# / ASP.NET MVC, Razor and React-based storefronts, RESTful Web APIs, and the underlying SQL Server data layer.
- **Payment gateways and checkout flows** — designed and integrated end-to-end, including third-party provider connections, secure token handling, webhook listeners, order-state reconciliation, and refund and dispute logic.
- Architect RESTful Web APIs with JWT authentication, role-based authorization, Swagger documentation, and consumer-facing SDKs for partner, mobile, and ERP integrations.
- Develop responsive front-end interfaces using HTML, CSS, JavaScript, and React, ensuring consistent UX across desktop and mobile storefronts and admin dashboards.
- Build custom nopCommerce plugins and modules for catalog, pricing, promotions, shipping, tax, and admin workflows, integrating cleanly with the platform's extensibility model.
- Optimize SQL Server performance — refactoring schemas, stored procedures, indexes, and Entity Framework queries to improve response times across catalog, search, and checkout pages.
- Manage deployments, environment configuration, and post-release monitoring on IIS and Azure; handle production incident response, hotfix delivery, and database migration safety.
- Collaborate with clients and project managers in an Agile setup — scoping, estimating, and delivering features from requirements gathering through QA and release.

Faculty Teacher (Part-time)

2024

STI COLLEGE

- **Database course** — teaching SQL fundamentals, relational design and normalization, ER modeling, query writing and optimization, and hands-on lab work in SQL Server and MySQL, including the implementation of stored procedures and views.
- **Android Development module** — covering Android Studio setup, Java/Kotlin basics, activity and fragment lifecycle, XML layouts and UI components, intents, data persistence, and the end-to-end build and deployment of functional mobile applications.
- **Basic Programming (C#) course** — introducing programming fundamentals such as variables, data types, control flow, methods, and core object-oriented concepts (classes, inheritance, encapsulation), reinforced with hands-on console-application exercises in .NET.
- Prepare detailed lesson plans, weekly lab exercises, quizzes, and end-of-term assessments aligned with the STI curriculum; mentor students on capstone and term projects, code reviews, and debugging sessions.

WordPress Developer

2018 – 2019

INFINITECH SOLUTIONS

- Built responsive WordPress websites using PHP, HTML, CSS, and JavaScript.
- Delivered custom themes and plugins tailored to client requirements.
- Maintained existing client sites, handling content updates, performance fixes, and bug resolution.

Graphic Designer

2017 – 2018

ZEPH SOLUTIONS

- Designed layouts and production assets for advertisements, brochures, magazines, and reports.
- Worked directly with clients to translate briefs into print-ready deliverables.

Junior Software Quality Assurance

Dec 2016 – Oct 2017

MYDRIVEHOLIDAY CAMPER TRAVEL

- Validated and secured campervan booking data — verifying reservation records, pricing accuracy across vehicle types and date ranges, and data integrity throughout the booking pipeline.
- Performed end-to-end functional testing of the booking website — covering reservation flows, search and filter logic, payment paths, and admin/operator dashboards.
- Validated UI/UX consistency across desktop and mobile views — flagging layout issues, responsive bugs, and usability gaps for the development team.
- Documented test cases, defects, and reproduction steps; collaborated with developers to verify fixes and regression-test releases before deployment.

EDUCATION

Bachelor of Science in Information Systems

2012 – 2016

Carlos Hilado Memorial State College

Major in Web and Mobile Development

CERTIFICATIONS

Learn Photoshop — Essential Training Course

April 2021

Udemy Online Courses

ADDITIONAL INFORMATION

- **Backend:** ASP.NET Core, ASP.NET MVC, Blazor, C#, PHP, Entity Framework Core, SQL Server, Web API, nopCommerce
- **Frontend:** React, Angular, Blazor, JavaScript, HTML5, CSS3, Tailwind CSS, Framer Motion
- **Cloud & DevOps:** Azure App Services, Azure SQL Database, CI/CD pipelines, Git
- **Video Editing:** CapCut, Vegas Pro, Filmora, Adobe Premiere Pro, DaVinci Resolve, FFmpeg, color grading, short-form content
- **AI Automation:** Node.js, Playwright, OpenAI / Claude APIs, TikTok Upload, Facebook Graph API, scheduled cross-platform publishing
- **Tools:** Visual Studio, VS Code, Postman, Swagger, Git, Jira
- **Strengths:** Clean architecture, SOLID principles, performance optimization, Agile delivery, cross-discipline collaboration
